

truFRAME[®] LVL FRAMING

Futurebuild[®] LVL is pleased to offer truFRAME[®] LVL Framing to the New Zealand market. Futurebuild LVL offers the most extensive range of LVL products to the New Zealand market including familiar brands such as hySPAN[®], hyONE[®], hyCHORD[®], hy90[®] & hyJOIST[®] and now truFRAME. All of our products are manufactured in Northland at our production facility and available to customers nationwide.

FEATURES AND BENEFITS

- truFRAME Futurebuild LVL may be directly substituted for an equivalent section size SG8 which has been specified using NZS 3604, designIT[®] for houses software, or subject to Specific Engineering Design
- Straight and true for ease of fabrication and construction
- Less prone to warp, twist and cup than traditional sawn timber sections
- H1.2 glue-line and surface spray treated to the requirements of NZS 3640
- Manufactured in New Zealand, from sustainably grown plantation pine
- Available FSC[®] CoC Certified (FSC-C007103) on request

truFRAME is available for specification through the designIT for houses and designIT for commercial floors software packages available for download at chsoftware.co.nz.

truFRAME RANGE

truFRAME is offered in 90x45, 140x45, 190x45, 240x45 and 300x45 sizes. Available lengths and the number of pieces per pack are detailed in the table below. All product is available from Futurebuild LVL via your preferred building supplies merchant.
